CALL MONEY IS HELD AT FIRM RATES.

New York., Oct. 12.-Stocks in further speculative liquidation came upon the market in large volume this morning un- Wal der the continued influence of the same day. The London stock market seemed in equally depressed with New York over W the significance of the opinions expressed by the bankers' convention by Mr. Vanderlip, vice president of the National bank. Lower prices for Americans were established there and London began to sell stocks here as soon as the market opened. Later the New York market became very irregular with occasional were established there and London began to self stocks here as soon as the market opened. Later the New York market became very irregular with occasional recoveries. But the principal activity was while prices were decilning. The recoveries were due in large part to the taking of profits by bearish traders who had sold short earlier and there was no revival of active operations for an advance except in the case of a few stocks, which are in the hands of speculative pools. The relaxation of the selling pressure was due in part to the interpretation of several incidents as indicated benevolent at titude towards the market on the part of the powerful group of capitalists whose opinion was supposed to the prevention of experiment vesterday.

For one thing the stocks in which this group distributed sentiment vesterday.

For one thing the stocks in which this group of capitalists is supposed to take a particular interest were inclined to resist the prevailing depression. Amalgamated Copper amongst the industrials and St. Paul amongst the railroads, were the conspicuous examples. When the money rate opened at 6 per cent and fears began to be felt that it would rise above that, practically unlimited amounts were offered at that rate by the Natiohal City bank. It was inferred from this that a corrective was designed, for the impression created in speculative circles by the paragraphs in the banker's address which were made most of the market yesterday.
